1	<p>As mentioned in Clause 2 of Prequalification Criteria it is mentioned that JV consortium are allowed on the condition that lead partner of the bidding JV consortium should be system integrator and content provider for shows of similar works and in its name. If above point is not removed then there will be no significance of joint venture as very few companies/firms have above credentials. It will lead to very few tender participants hence less competitive rates.</p> <p>You are hereby requested to allow firm/company meeting qualifying criteria of any part A or part B to become lead party by JV/consortium in total must have both qualifications.</p>	No Change
